Dental Hygiene Program

Associate in Applied Science in Dental Hygiene

Program Description

The Dental Hygiene Program is an Associates Degree program that is five semesters in length and is comprised of didactic, clinical, and laboratory courses offered at the Health Science Campus. Students will experience real-life patient interactions through clinical courses and will have the opportunity to work with a variety of patients of diverse backgrounds. Students will also have the opportunity to hone their clinical skills in an on-site, fully-functioning, dental hygiene clinic. Dental hygiene students will be able to study and practice all procedures they will be licensed to perform, including scaling (cleaning) teeth above and below the gumline, polishing structures above the gum-line, performing infiltration anesthetic procedures, teaching oral hygiene instruction, nutritional counseling, and performing all duties of an Expanded-Duty Dental Assistant.

Is it for you?

The qualified candidate will have excellent manual dexterity, effective communication skills, the ability to maintain a professional demeanor and function well in a clinical setting, and work well in a team environment. Dental hygienists must have extensive knowledge of head and neck anatomy, pharmacology, and clinical procedures.
