Policy Description

The mission of the Florence-Darlington Technical College Library is to serve the educational needs of students, faculty, staff, and members of the community by providing them with print, non-print, and electronic resource materials. These materials provide support for the college's transfer, technical education, and continuing education programs and are for use by individuals concerned with personal or professional growth and development. This mission is fulfilled by professional staff who assist patrons in their effective use of the library's resources.
